

MRITYUNJAY KUMAR

Growth & GTM Marketing Leader — B2B SaaS | 0→10M ARR | One-Person Marketing Functions

Jaipur, India | +91-8955767511 | mrityunjayaa@gmail.com | mkumar.xyz | linkedin.com/in/mjay7

SUMMARY

Full-stack B2B SaaS marketer with 9+ years of experience marketing to US and Canadian buyers, including 5 years as the sole marketing owner at Bellwether Purchasing Software (procurement SaaS, acquired by Embrace Software) through its 0–10M ARR stage. Built and ran demand generation, SEO, lifecycle, CRM/HubSpot automation, website and product marketing end to end — lifting organic traffic 200%+ and MQLs 125% while managing \$250K in annual paid spend. Now building AI-powered GTM systems — outbound automation, lead scoring and marketing workflows spanning n8n, Clay, LLM APIs and Streamlit — to extend what a lean marketing team can execute. Best fit for founder-led or early-stage B2B SaaS teams that need one person who can own strategy and execution across the full funnel.

CORE SKILLS

GTM & Product Marketing: Go-to-Market Strategy, Positioning & Messaging, ICP Development, Competitive Positioning, Sales Enablement

Growth Marketing: Demand Generation, Paid Acquisition (Google/LinkedIn Ads), Funnel & CRO, Lifecycle Marketing, Landing Pages, Marketing Analytics

Marketing Operations: HubSpot (5 yrs Super Admin), Salesforce, Notion, CRM Automation, Lead Nurturing, Segmentation, Attribution, Revenue Reporting

Content & Organic Growth: SEO / GEO / AEO Strategy, Technical SEO, Content Strategy, WordPress, Conversion Copywriting

AI & Automation: n8n (self-hosted), Clay, Apollo.io, Zapier, Looker Studio, LLM APIs, Prompt Engineering, Streamlit, Groq APIs, Lead Scoring & Enrichment, AI-Assisted Workflow Design

PROFESSIONAL EXPERIENCE

Marketing Consultant — Toptal Network

May 2026 – Present

Accepted into Toptal's vetted freelance network; building AI-powered GTM systems and tooling (see below) while evaluating client engagements.

Marketing Manager — Bellwether Purchasing Software

Oct 2021 – Apr 2026

Sole marketing owner for a procurement SaaS platform serving SMB and government buyers across the US and Canada — the only marketer, reporting directly to the founder. (Company acquired and restructured; role eliminated in a broader team reduction.)

- Grew organic traffic 200%+ in 12 months by rebuilding SEO, content and website strategy from the ground up, making organic search the second-largest source of pipeline and revenue.
- Lifted MQLs 125% in 6 months at a lower cost per lead by diversifying ~\$250K in annual acquisition spend beyond a single dependent channel across Google Ads, LinkedIn Ads and Capterra.
- Rebuilt paid acquisition campaigns in-house after an outsourced agency engagement underperformed, restoring qualified lead flow and positive ROI within the existing budget.
- Built HubSpot nurture workflows and lifecycle sequences that converted low-intent leads into sales-qualified opportunities, tightening handoff with the sales team.
- Optimized campaigns against a 6-month B2B sales cycle using downstream signals — SDR qualification, demos, opportunities and revenue potential — rather than raw lead volume.
- Owned positioning, messaging, landing pages and sales enablement collateral end to end, and progressively brought agency/contractor work in-house to cut cost and improve speed.

Digital Marketing Specialist — SalesIntel

Jul 2019 – Sep 2021

Demand generation for a sales intelligence platform competing for US/Canada B2B buyers against ZoomInfo and other established players.

- Ran persona-based inbound and email campaigns across multiple buyer segments, improving engagement and lead progression through the funnel.
- Built SEO and content initiatives that grew organic visibility and inbound engagement in a highly competitive category.
- Produced content mapped to competitive positioning and objection handling to support sales conversations against larger incumbents.
- Partnered cross-functionally to read campaign performance data and translate it into ongoing optimization.

Content & Digital Marketing Executive — Konstant Infosolutions

Mar 2017 – May 2019

- Produced SEO-focused content that supported inbound lead generation across multiple client accounts.
- Built marketing collateral and sales enablement assets alongside digital campaign execution and audience targeting.

Copywriter — Syon Infomedia

Jul 2016 – Dec 2016

- Wrote marketing and campaign copy across multiple industries, supporting brand communication and digital campaigns.

AI & AUTOMATION PROJECTS

Self-built GTM and marketing tools using Clay, n8n, Streamlit and Groq APIs to extend what a one-person marketing function can execute (mkumar.xyz/labs):

- **Outbound Intelligence Engine** — a multi-tool outbound system (Clay, n8n, Notion, Gmail, Zapier, Looker Studio) that enriches and scores target accounts against a weighted ICP model, personalizes email, LinkedIn and call outreach per lead with AI, and routes only tier-qualified leads to automated sending.
- **ICP Strategy Agent** — that identifies target segments, positioning gaps and messaging recommendations from company data.
- **ContentFlow AI** — a multi-channel workflow that repurposes and optimizes one piece of content into multiple assets.
- **RankFlow AI** — an SEO planning workflow that generates keyword clusters, search-intent analysis and content recommendations.
- **Lead Intelligence Automation** — an n8n workflow that pulls data from lead form, performs AI enrichment, scores the leads, and notifies sales on Slack for high scoring leads with a summary and recommended action.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science — Rajasthan Technical University, 2012–2016
